

Danielle Payne

Associate, Professional Interior Designer, ft3 Architecture Landscape Interior Design

Danielle Payne graduated with a Bachelor of Environmental Design and a Master of Interior Design from the University of Manitoba before joining ft3 Architecture Landscape Interior Design as an interior designer. From there, she acquired her NCIDQ certification, establishing herself as a Professional Interior Designer while becoming one of the firm's associates.

Primarily focused on health and wellness design over the last six years, Danielle achieved her WELL Accreditation and has worked on notable healthcare projects such as St. Boniface Hospital's New Emergency Department, Health Science Centre's Acute Stroke Unit (the first in Manitoba) and the New Portage District General Hospital, specializing in, but not limited to, clinical, emergency department, and pharmacy design.

Danielle strongly believes that building connections with clients and end users is the key to a successful final design. With a focus on a human-centred design approach, Danielle's passion is designing spaces that promote an elevated environment of health, healing, and well-being for those who occupy them.
