

Melanie Chatfield**Energy Analyst, City of Winnipeg**

Melanie Chatfield is an Energy Analyst with the City of Winnipeg. With a background in mechanical engineering, she has over 15 years of high-performance building experience.

Melanie is responsible for the reduction of energy consumption and carbon emissions at the City. She works with the Municipal Accommodations department to identify opportunities for energy conservation through operational and capital investment methods. With direct knowledge, she understands how energy efficiency education and assistance is essential to building owners, operations and maintenance staff and design consultants.

In addition to Melanie's work as an Energy Manager, she has five years of experience in project management working on various construction projects, including several environmental projects in the UK.
