

Judy Redmond

Accessibility Consultant, J. Redmond Consulting

Specializing in disability and accessibility issues for the City of Winnipeg for 22 years, Judy has utilized community participatory processes and inclusive design to assist designers in creating accessible environments. A Master of Science degree in Accessibility and Inclusive Design from the School for the Built Environment in Salford, UK compliments Judy's decades of practical experience.

As current owner and operator of J. Redmond Consulting Inc., Judy has developed practical tools and procedures, done research, plan review, auditing, and report writing for several national and local projects. She has a passion for searching out new and innovative ways to make a more inclusive, comfortable, and welcoming place for everyone across a lifespan that enhances accessibility in the built environment.

Judy has been a trainer and graduate studies guest lecturer and has spent time presenting and learning about disability and accessibility issues in other countries such as England, United States, Brazil, Japan, Russia, and Ukraine. She has recently stepped back from the National Research Council Building Code Use and Egress Technical Committee, the Canadian Standards Association B651 Accessibility Technical Committee, the Technical Committee on the Built Environment for Accessibility with Accessibility Standards Canada, the City of Winnipeg Access Advisory Committee, the Accessibility Council for Manitoba, and the Inclusive Design Advisory Committee for the Canadian Human Rights Museum, demonstrating her overall commitment to accessibility.
